Office Action Summary

Application No.

09/631,576

Applicant(s)

BLAKE, LARRY W.

Examiner

Javier G. Blanco

Art Unit

3738

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 February 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 40,51-72,74,75 and 77-81 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 40,51-53,56,67,68,74 and 77-81 is/are rejected.
- 7) ☒ Claim(s) 54,55,57-66,69-72 and 75 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 77-79 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

New claim limitation “extend generally in the plane of the optic (or haptic)” (see claims 77-79) renders the claim vague and indefinite as to the distribution of said structures in the plane of the optic (or haptic). By “generally extending in the plane” it could be interpreted that those structures extend either parallel or perpendicular to said plane.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 40, 51-53, 56, 67, 68, 74, and 79-81 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Benjamin (FR 2,728,459).

As seen in Figures 3, 4, and 8-15, Benjamin discloses a two-part IOL comprising an optic (Figures 8-11: lens 37; Figures 12-15: lens 43) made of silicone (see page 9) and a haptic(s) (double ring 28) made of PMMA (see page 9).

Art Unit: 3738

With specific reference to Figures 8-11, Benjamin teaches at least two cleats (bridges 31) on the haptic (double ring 28) extending generally in the plane of the haptic, and at least two eyelets (peripheral holding device 53 having a median slit 38) on the optic (lens 37) allowing each of said cleats to firmly attach to one of said eyelets on the (see pages 6-8), wherein said two-part IOL is configured to pass completely through a small opening without folding the haptic (see page 6 for explanation of how double ring 28 is inserted by rotation by inserting first chamfered edge 17 of narrow oblique opening 15).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 77 and 78 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Benjamin (FR 2,728,459).

As seen in Figures 3, 4, and 8-15, Benjamin discloses a two-part IOL comprising an optic (Figures 8-11: lens 37; Figures 12-15: lens 43) made of silicone (see page 9) and a haptic(s) (double ring 28) made of PMMA (see page 9).

With specific reference to Figures 12-15, Benjamin teaches at least two cleats on the optic (lens 43), at least two eyelets (keyhole openings 24) on the haptic (double ring 28) allowing the cleats to firmly attach to the eyelets (see pages 7 and 8), wherein said two-part IOL is configured to pass completely through a small opening without folding the haptic (see page 6 for

Art Unit: 3738

explanation of how double ring 28 is inserted by rotation by inserting first chamfered edge 17 of narrow oblique opening 15). Two possible interpretations of what the Examiner considers as the cleats in the optic:

First interpretation: The external area 44 + projection 45 + stem 46 comprises a cleat assembly. As seen in Figures 14 and 15, said assembly extends generally in the plane of the optic.

Second interpretation: Projection 45 + stem 46 comprises a cleat. With this interpretation, said cleats extend perpendicular to the plane of the optic. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to extend the cleat generally in the plane of the optic because Applicant has not disclosed that extending the cleat generally in the plane of the optic provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the cleat extending in other positions as long as it will firmly attach to the corresponding eyelet. Also, the incision required for insertion would still be minimal.

Response to Arguments

7. Applicant's arguments with respect to claims 40 and 77-79 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

8. Claims 54, 55, 57-66, 69-72, and 75 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Javier G. Blanco whose telephone number is 703-605-4259. The examiner can normally be reached on M-F (7:30 a.m.-4:00 p.m.), first Friday of the bi-week off.

Art Unit: 3738

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 703-308-2111. The fax phone numbers for the organization where this application or proceeding is assigned is 703-872-9306 for regular communications and After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
